PROFESSIONAL SUMMARY

Senior full-stack engineer with 5+ years building fast, production web applications end to end — from data model and server through UI, testing and cloud deployment. Recently delivered four production systems across construction, procurement, retail and marketing, including a multi-tenant construction platform, an offline-first desktop retail ERP, and an AI-powered conversational sales assistant. Skilled in TypeScript, React, Node.js, Prisma and PostgreSQL, with test-driven delivery on AWS and a strong agentic, AI-assisted development practice.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL
Frontend: React, React Router (SSR), Tailwind CSS, shadcn/ui, Radix, Chakra UI, Material UI, TanStack Table, Recharts
Backend: Node.js, Express, Prisma, PostgreSQL, MongoDB, SQLite/libSQL, Supabase
Cloud: AWS (Lambda, S3, SES, CloudFront), GitLab CI
Desktop: Electron, electron-builder, code signing (macOS, Windows)
Testing: Cypress, Vitest, Istanbul, Sentry
AI & Automation: LLM integration (Claude, Nova), agentic development workflows, LLM orchestration, AI-assisted delivery with CI guardrails
Other: i18n & RTL (Arabic), PDF generation, accessibility

EXPERIENCE

Senior Software Developer IONAI Technology Solutions	<i>Jun 2025 – Present</i>
Senior Software Developer Geeky Nerds Infotech Pvt Ltd	<i>Sep 2022 – Jun 2025</i>
Assistant System Engineer Tata Consultancy Services	<i>Oct 2020 – Sep 2022</i>

PROJECTS

IONAI Technology Solutions

Maktaabi — Multi-tenant Construction Project Management SaaS

Stack: React Router (SSR) · React · TypeScript · Chakra UI · Prisma · PostgreSQL · AWS

- Designed and built a multi-tenant construction ERP covering BOQ, RFQ, tendering, purchase planning, inventory, invoicing, asset management and Gantt-based project scheduling.
- Built a granular authorization system across organisations, roles, modules and per-user permission overrides, with tenant data isolation enforced across the application.
- Diagnosed and fixed a class of silent financial data loss in production, caught by writing a concurrency test rather than by inspection.
- Improved dashboard load time from 15–26 seconds to near-instant by resolving inefficient database queries in the project-timeline and purchase-planning flows.
- Delivered full Arabic RTL localisation, server-rendered PDF generation for invoices and purchase orders, and spreadsheet import/export, backed by a comprehensive Vitest and Cypress test suite.

RetailOS — Offline-first Retail ERP (signed desktop application)

Stack: React Router (SSR) · React · TypeScript · Electron · Prisma · libSQL/SQLite · Tailwind CSS · shadcn/ui · AWS

- Designed and built a local-first, on-premise ERP for UAE wholesale retailers, packaged as a signed desktop app for Windows and macOS, delivered to a 1.0 release.
- Built a single-writer LAN setup where the host machine runs the server and shop terminals connect over the local network — multi-terminal use with no server infrastructure to administer.
- Built the transactional accounting core — purchases, sales invoices, receipts, payments and returns — handling double-entry ledgers, moving-average costing, oversell prevention and credit-limit enforcement.

- Implemented an append-only ledger so financial history can never be altered, with reversal-only voiding of documents.
- Built a license activation service on AWS with hardware-bound fingerprinting, a code-signing release pipeline, and nightly USB backup with a recovery-code restore path.

ProMag — Sales-to-Procurement & Asset Lifecycle Platform

Stack: React Router (SSR) · React · TypeScript · Tailwind CSS · shadcn/ui · Prisma · PostgreSQL · AWS

- Built a platform spanning the full commercial lifecycle — lead, opportunity, BOQ, proposal, sales order, project, procurement, inventory and fixed-asset management.
- Built a complete fixed-asset module: receiving, assignment and transfer approvals, stocktaking, depreciation, write-off, audit logging and a role-based permission matrix.
- Extended test coverage reporting to server-side code so it reflects the whole application, not just the browser bundle.
- Integrated an AI vendor-quote extraction service for automated document ingestion into the procurement flow, and established the reusable component and coding standards the team builds against.

HiserWorld — AI-Assisted Product Catalog & Lead Generation Platform

Stack: React Router (SSR) · React · TypeScript · Tailwind CSS · PostgreSQL · AWS

- Built a server-rendered product catalog and dealer-enquiry platform deployed to AWS.
- Built a streaming conversational sales assistant grounded in live catalog data, with tool use for structured lead capture and conversation persistence.
- Implemented layered abuse protection — per-IP rate limiting, turn caps and request validation — with graceful degradation when the model is unavailable.
- Achieved a perfect Lighthouse score for accessibility, best practices and SEO with a 0.8-second load time and zero layout shift.

Geeky Nerds Infotech Pvt Ltd

Hospital Admin Panel & Patient Portal

Stack: ReactJS · Tailwind CSS · Node.js · Express · MongoDB · AWS Lambda/S3 · JWT

- Built a responsive admin panel for hospitals to manage patient data and a secure patient portal for accessing medical documents.
- Integrated AWS S3 and Lambda for scalable, serverless document storage, with JWT authentication protecting sensitive patient data.

Risk Assessment Profiler (RAP)

Stack: Node.js · Express · REST API · MongoDB · JWT · Swagger · Procore · ChatGPT API

- Built scalable REST APIs for cross-system risk assessment, secured with JWT authentication and access controls.
- Integrated the ChatGPT API and Procore developer tools to extend platform capabilities, and documented the APIs with Swagger.

Tata Consultancy Services

Customer Engagement Tool (CET)

Stack: HTML · CSS · Bootstrap · Handlebars · Node.js · Express · PostgreSQL · Heroku

- Built responsive, user-friendly features and scalable backend functionality for an internal customer-interaction platform.
- Managed third-party API integrations and optimised PostgreSQL performance, deploying to Heroku.

EDUCATION

Master of Computer Application — Vellore Institute of Technology, Bhopal	2019
Bachelor of Computer Application — Raj Rishi Government College, Alwar	2017
